Pixel 2 XL	Yes	Yes
iPhone 5/SE	Yes	Yes
iPhone 6/7/8	Yes	Yes
iPhone 6/7/8 Plus	Yes	Yes
iPhone X	Yes	Yes
iPad	Yes	Yes
iPad Pro	No	No

Issues and Solutions:

On the Kindle Fire HDX , Nexus 10 and iPad Pro, the footer of the website was floating in the middle of the screen in both portrait and landscape mode orientation. This has been fixed with media queries. Creating media queries for only the iPad Pro and the Nexus 10 had ultimately fixed the bug with the Kindle Fire HDX and the iPad Mini too.
